4 Easy Steps

For The **Ultimate** Wiremarking System

Step 1 Collect the marking elements on the applicator

Step 2 Insert elements into the sleeve

Step 3 Slide sleeves on to wire

Step 4 Marking elements can be added or removed as required with removal hook

Get up to 6 Characters on a wire in 10 seconds, and it's permanent.

“The ultimate wire marker at an ordinary price.”

faxed lists

drawings

WE'LL DO THE WORK

AND DELIVER TO YOU

We can do the work for you. Once you have planned the job, simply provide us with your list of numbers for plotting. The quickest and easiest way to send this to us is via email on our spreadsheet format. There is no risk of error and turn around time is fast—even on large orders.

-  48 hour turnaround
-  Free delivery
-  Halogen free tags are available upon request
-  Via electronic source, hand drawn lists, schematics or spreadsheets
-  Avoid double entry. Convert your AUTOCAD files (or similar) - just ask how
-  We'll even sleeve them for you if required

For more information on our plotted tag service or for a copy of our spreadsheet format call 1800 999 440.

Purchase the new compact SI2K Thermal Printer!

**COMPLETELY
COMPATIBLE**

The SI2K thermal transfer printer is the most enhanced and versatile system for the marking of all electrical components.

A thermal transfer marking technique, that uses ribbons with special ink, ensures the quality and life of the marking on many plastic materials such as; PVC, Polyester, ABS, Polycarbonate.

Data preparation with the Simplo 2000 Software is quick and easy. Save time and convert your Autocad files (or similar). With total flexibility you can print wire and cable numbers, plates & labels for control panels, outside panels and adhesive strips, all tailored to your individual requirements and specifications. Printing is noiseless and fast.

-  5500 tags per hour (approx)
-  High quality resolution print
-  Low maintenance
-  Compact design and portable
-  Backup support eliminates downtime

903	5÷11																							

NOTE:
All the above data has an approximate value and refers exclusively to the diameters of single-cores. The appreciable differences in outside diameters of similar cable sections, are the result of differences in the thickness of the insulation of the cables. When choosing a sleeve according to cable section, please also refer to specific cable manufacturers data.
